

Tesi in cosmologia

Attraverso lo studio della struttura su grande scala dell'Universo

Stefano Casnera & Francesco Pace

**UNIVERSITÀ
DI TORINO**

The concordance cosmological model

Definition of **cosmology noun** from the Oxford Advanced Learner's Dictionary

cosmology *noun*

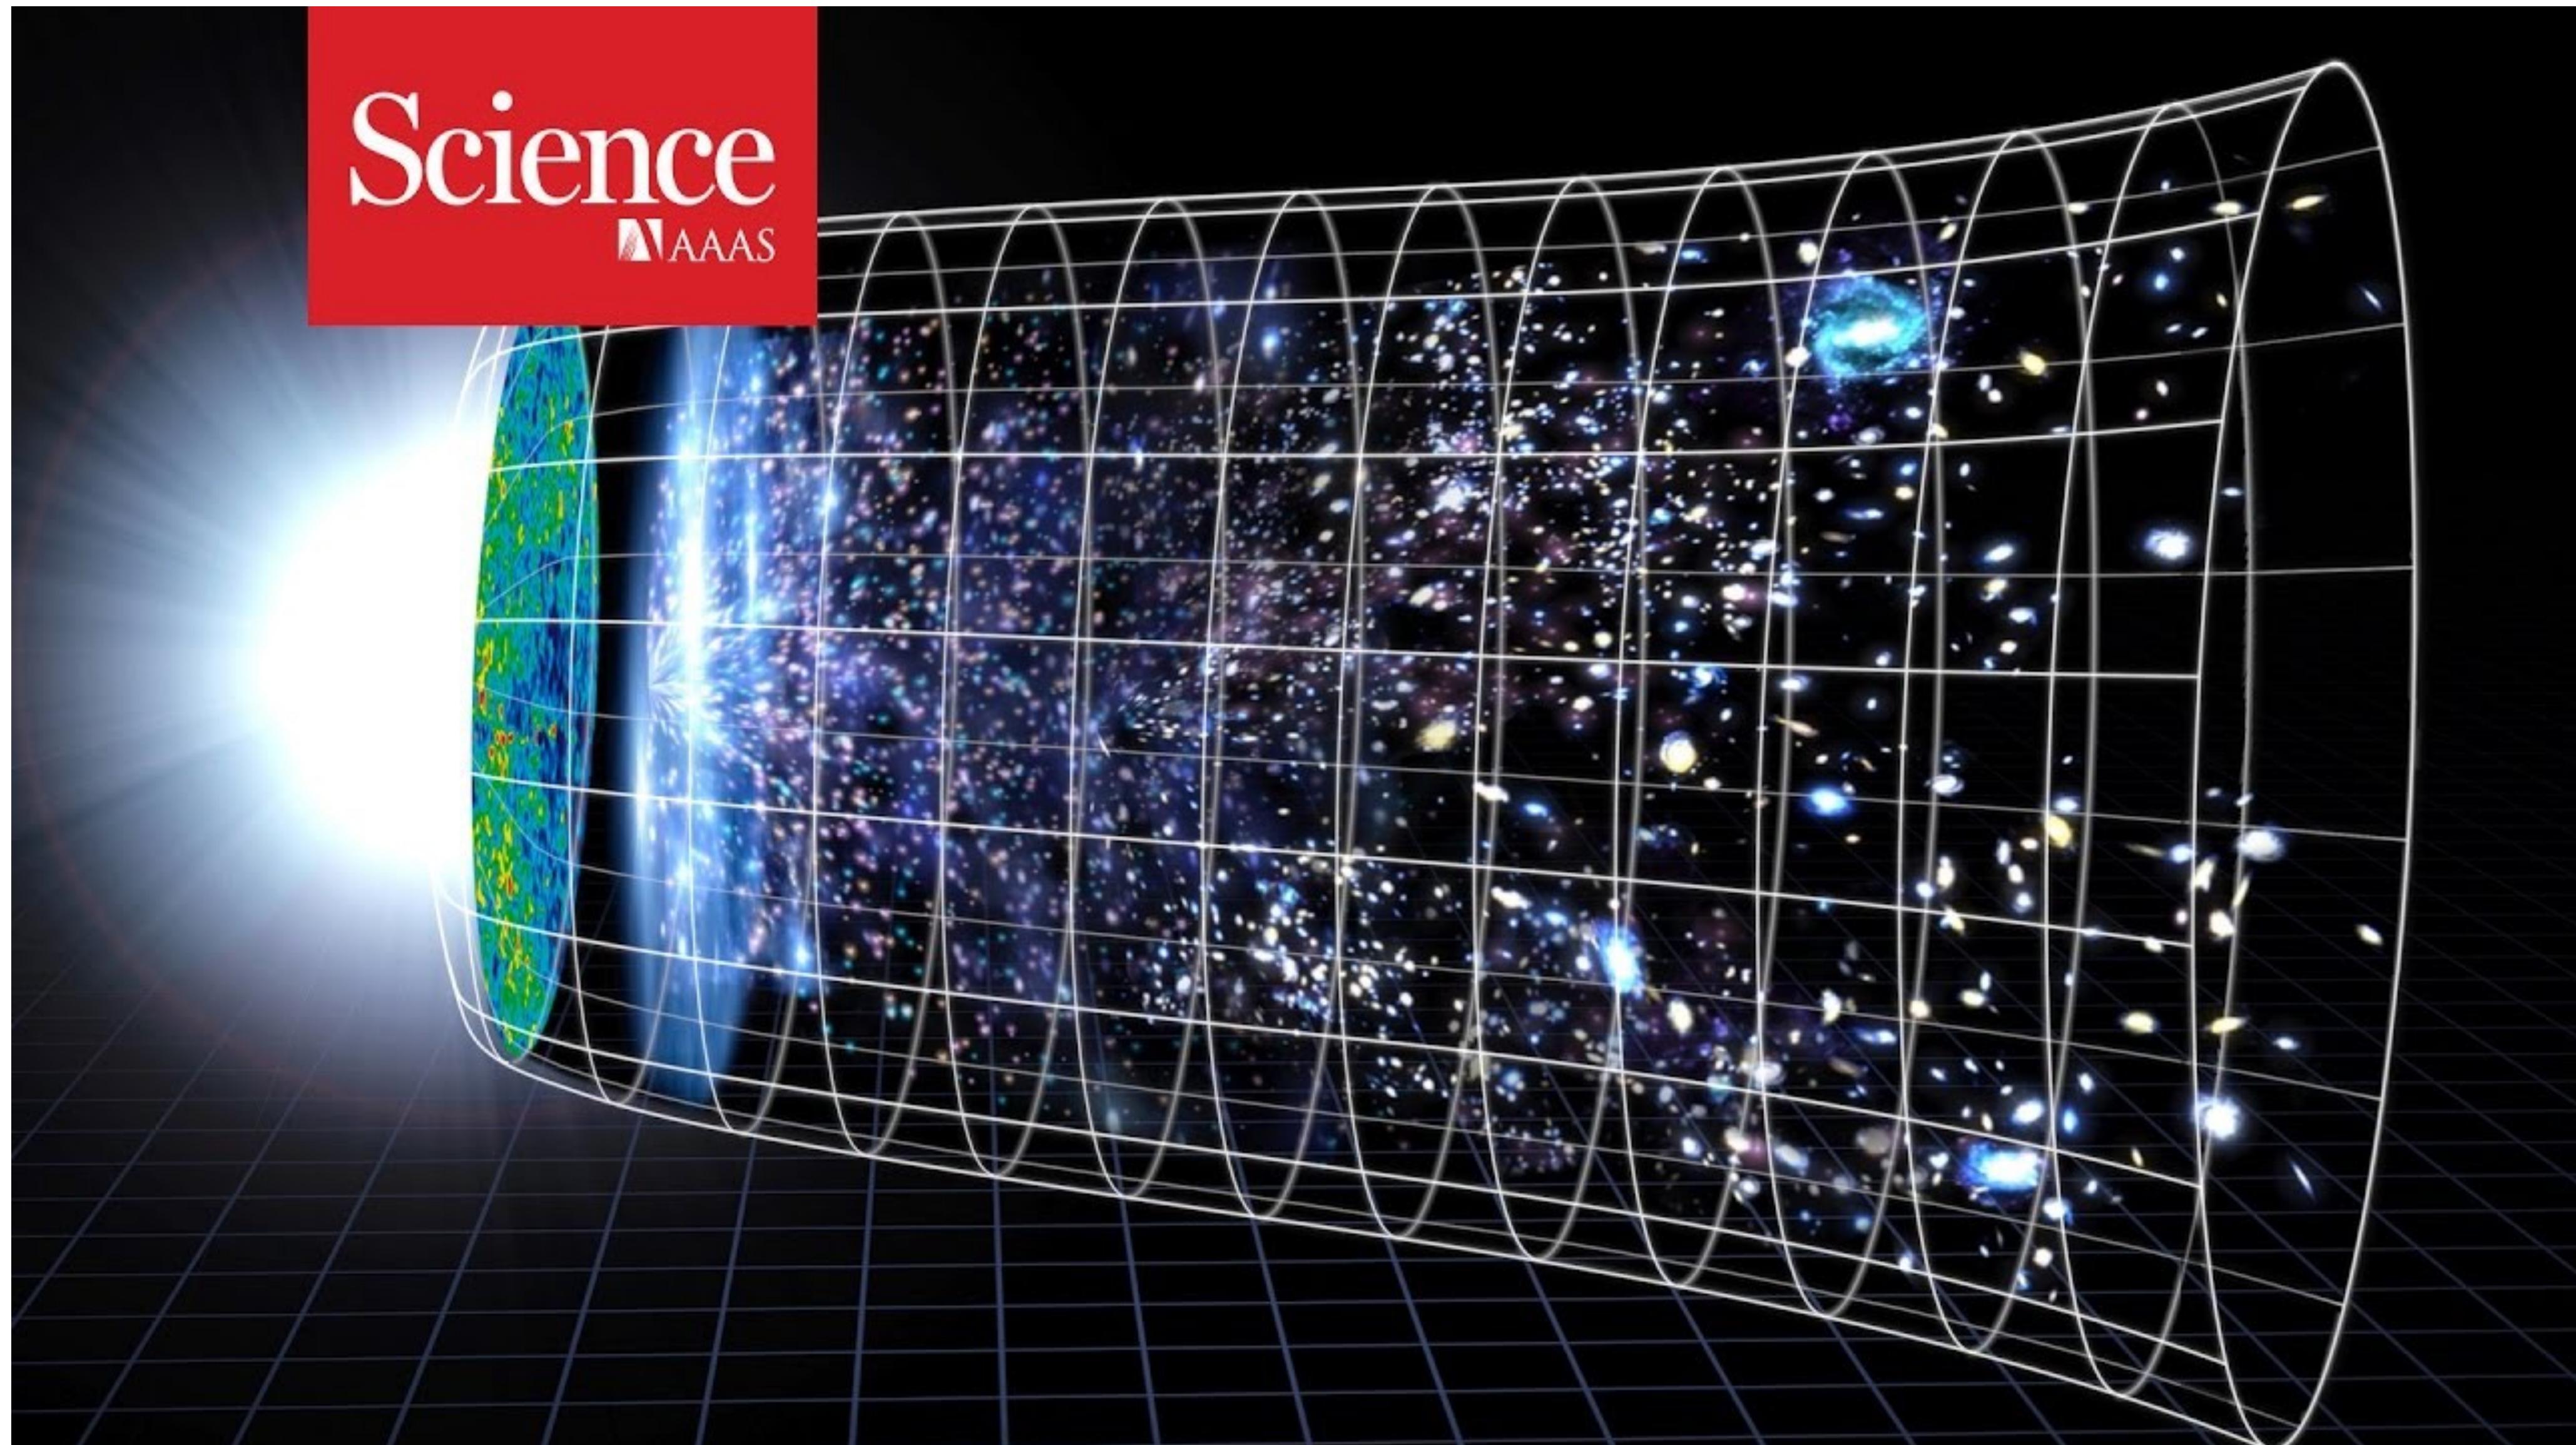

🔊 /kɒz'mɒlədʒi/

🔊 /kaɪz'maɪlədʒi/

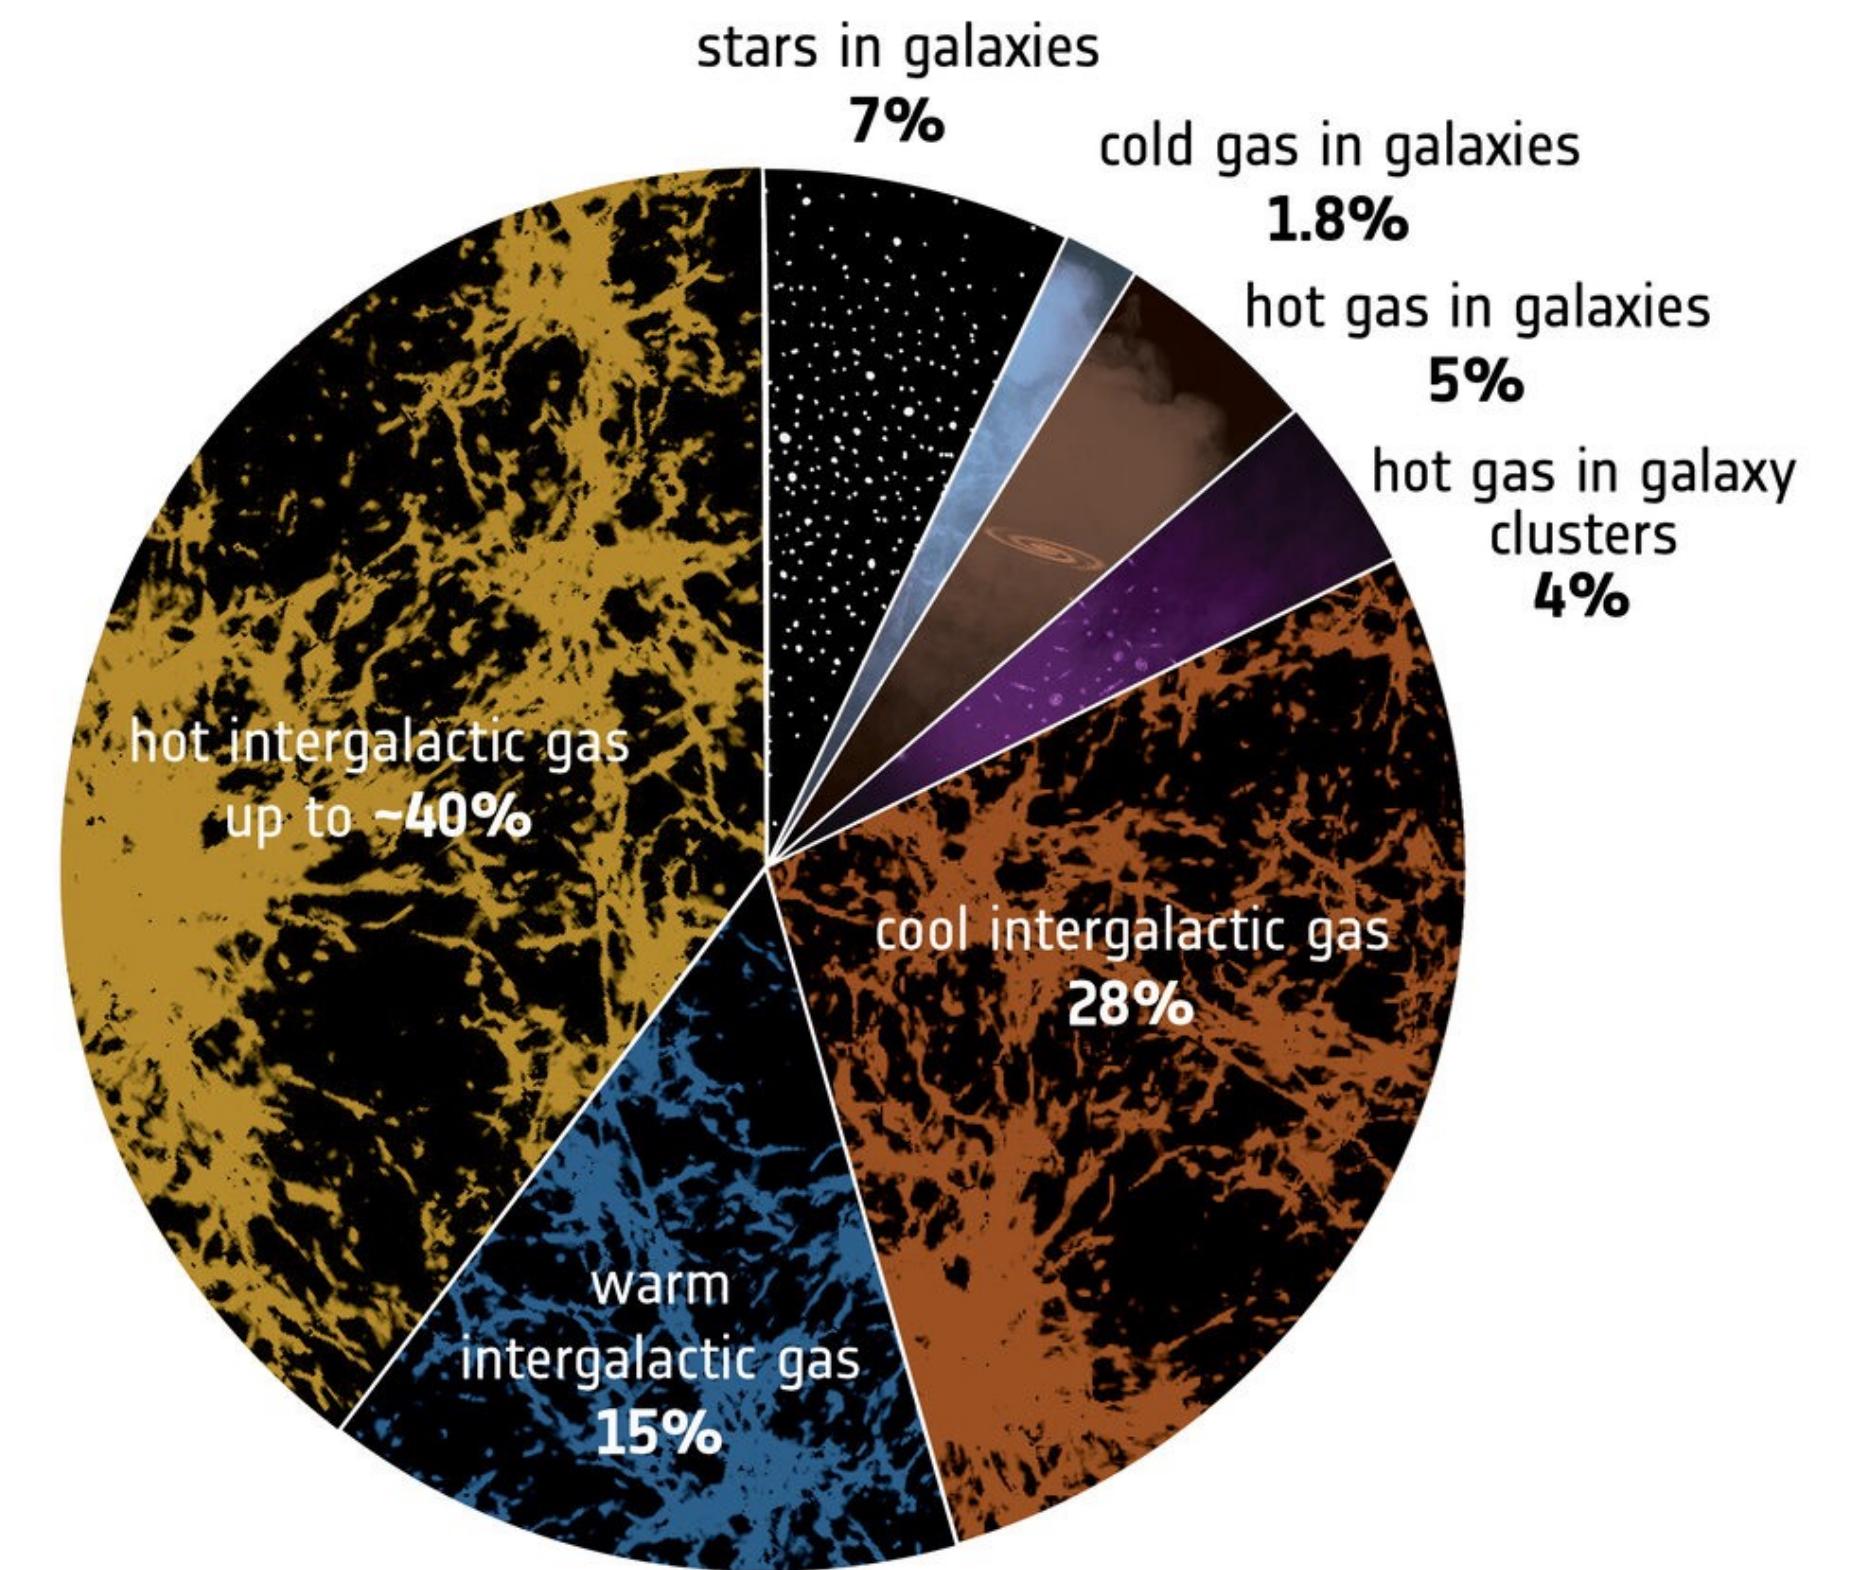

[uncountable]

★ the scientific study of the universe and its origin and development

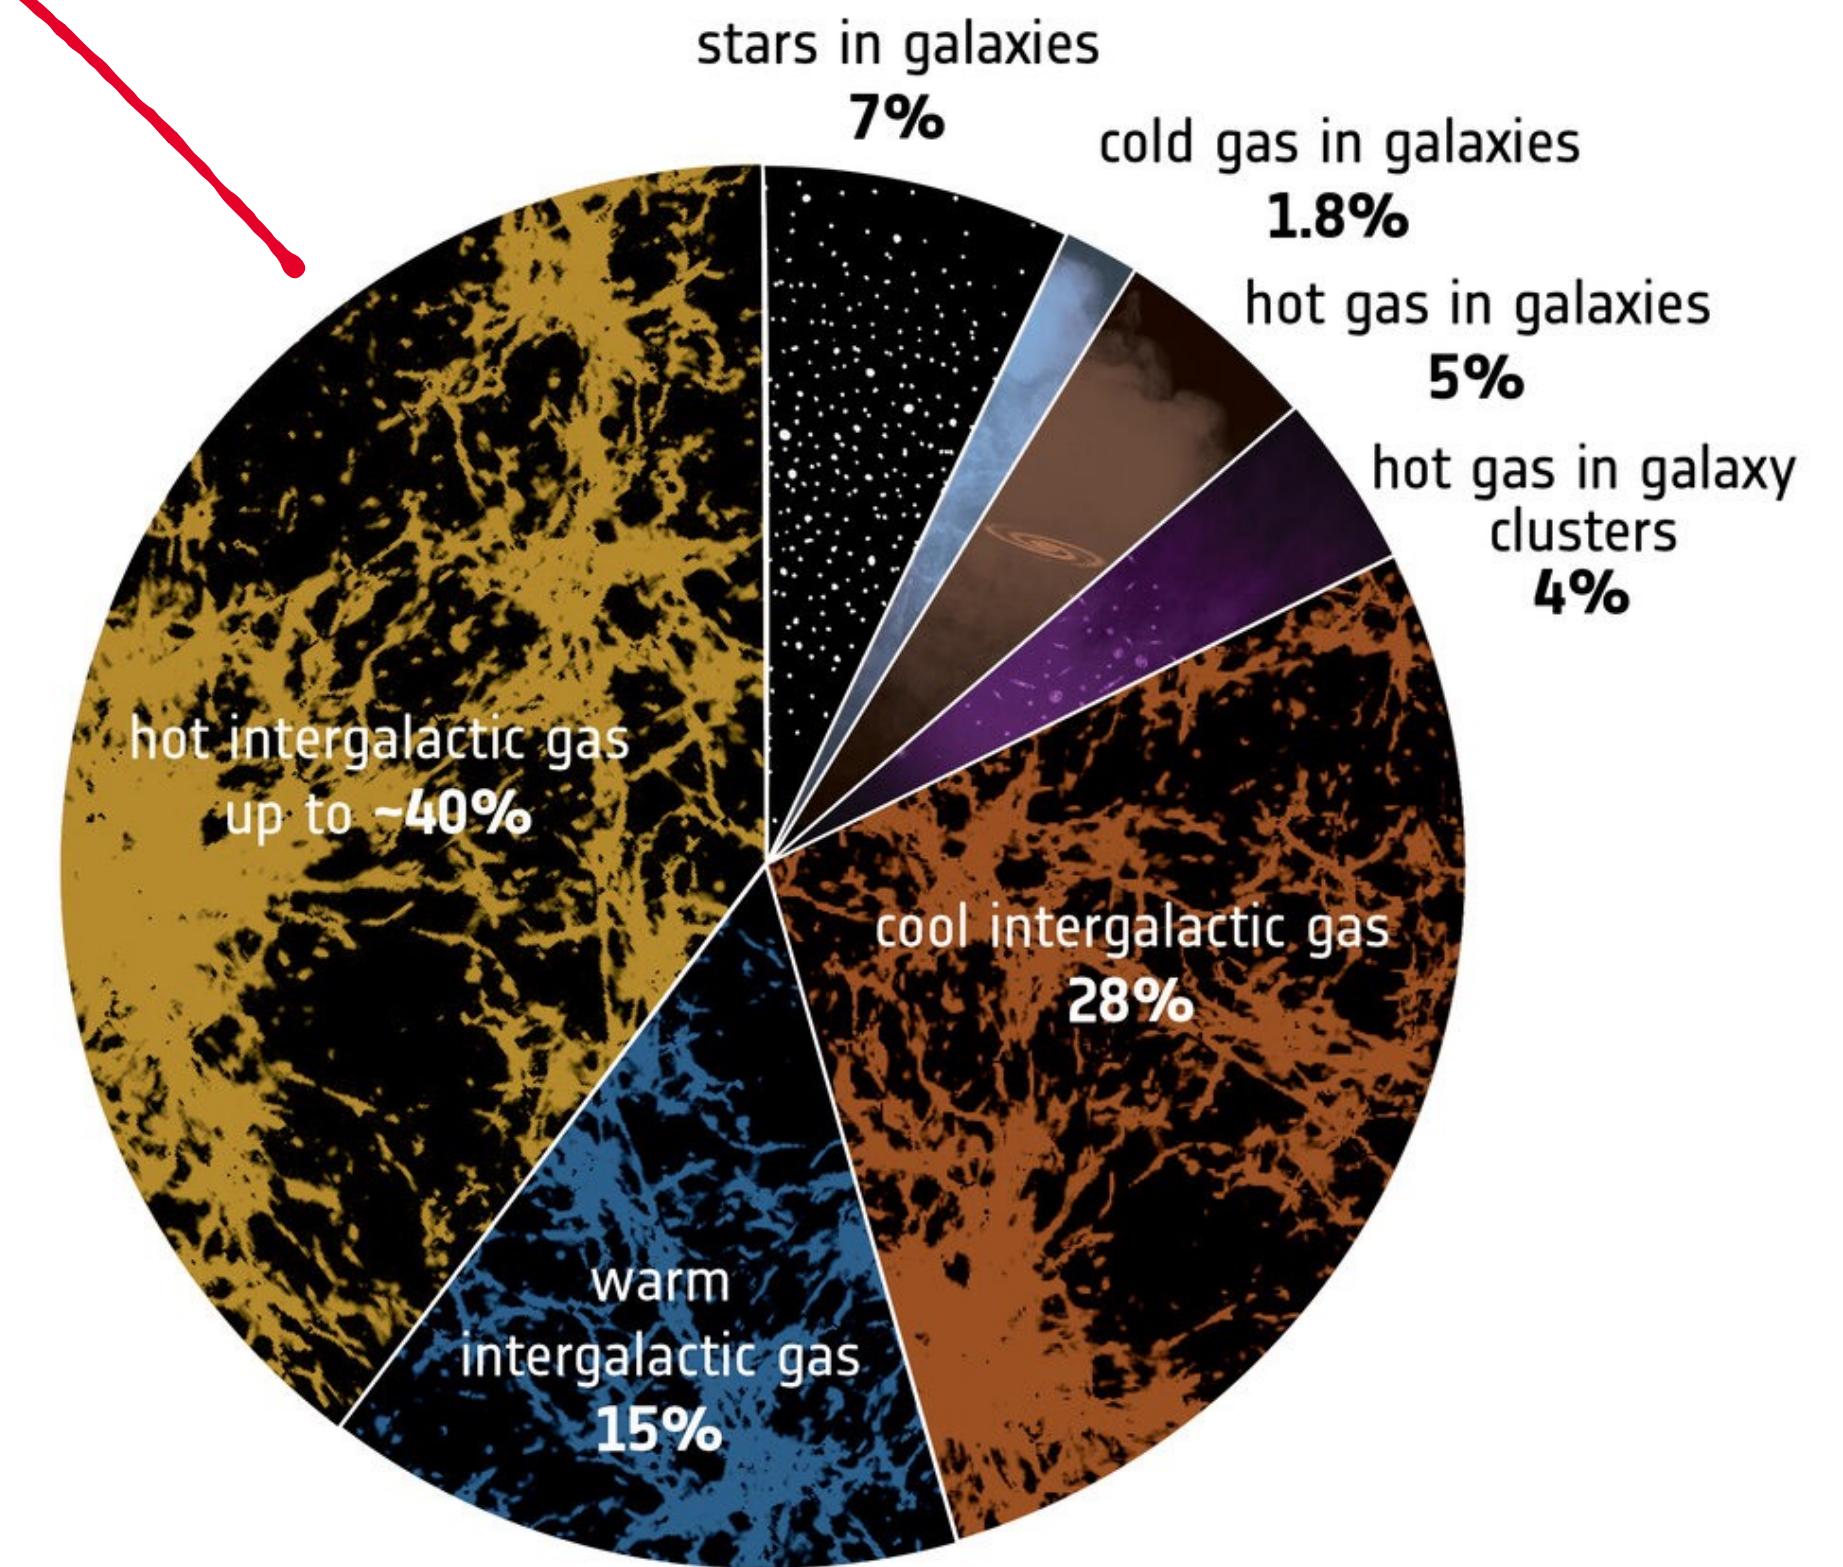

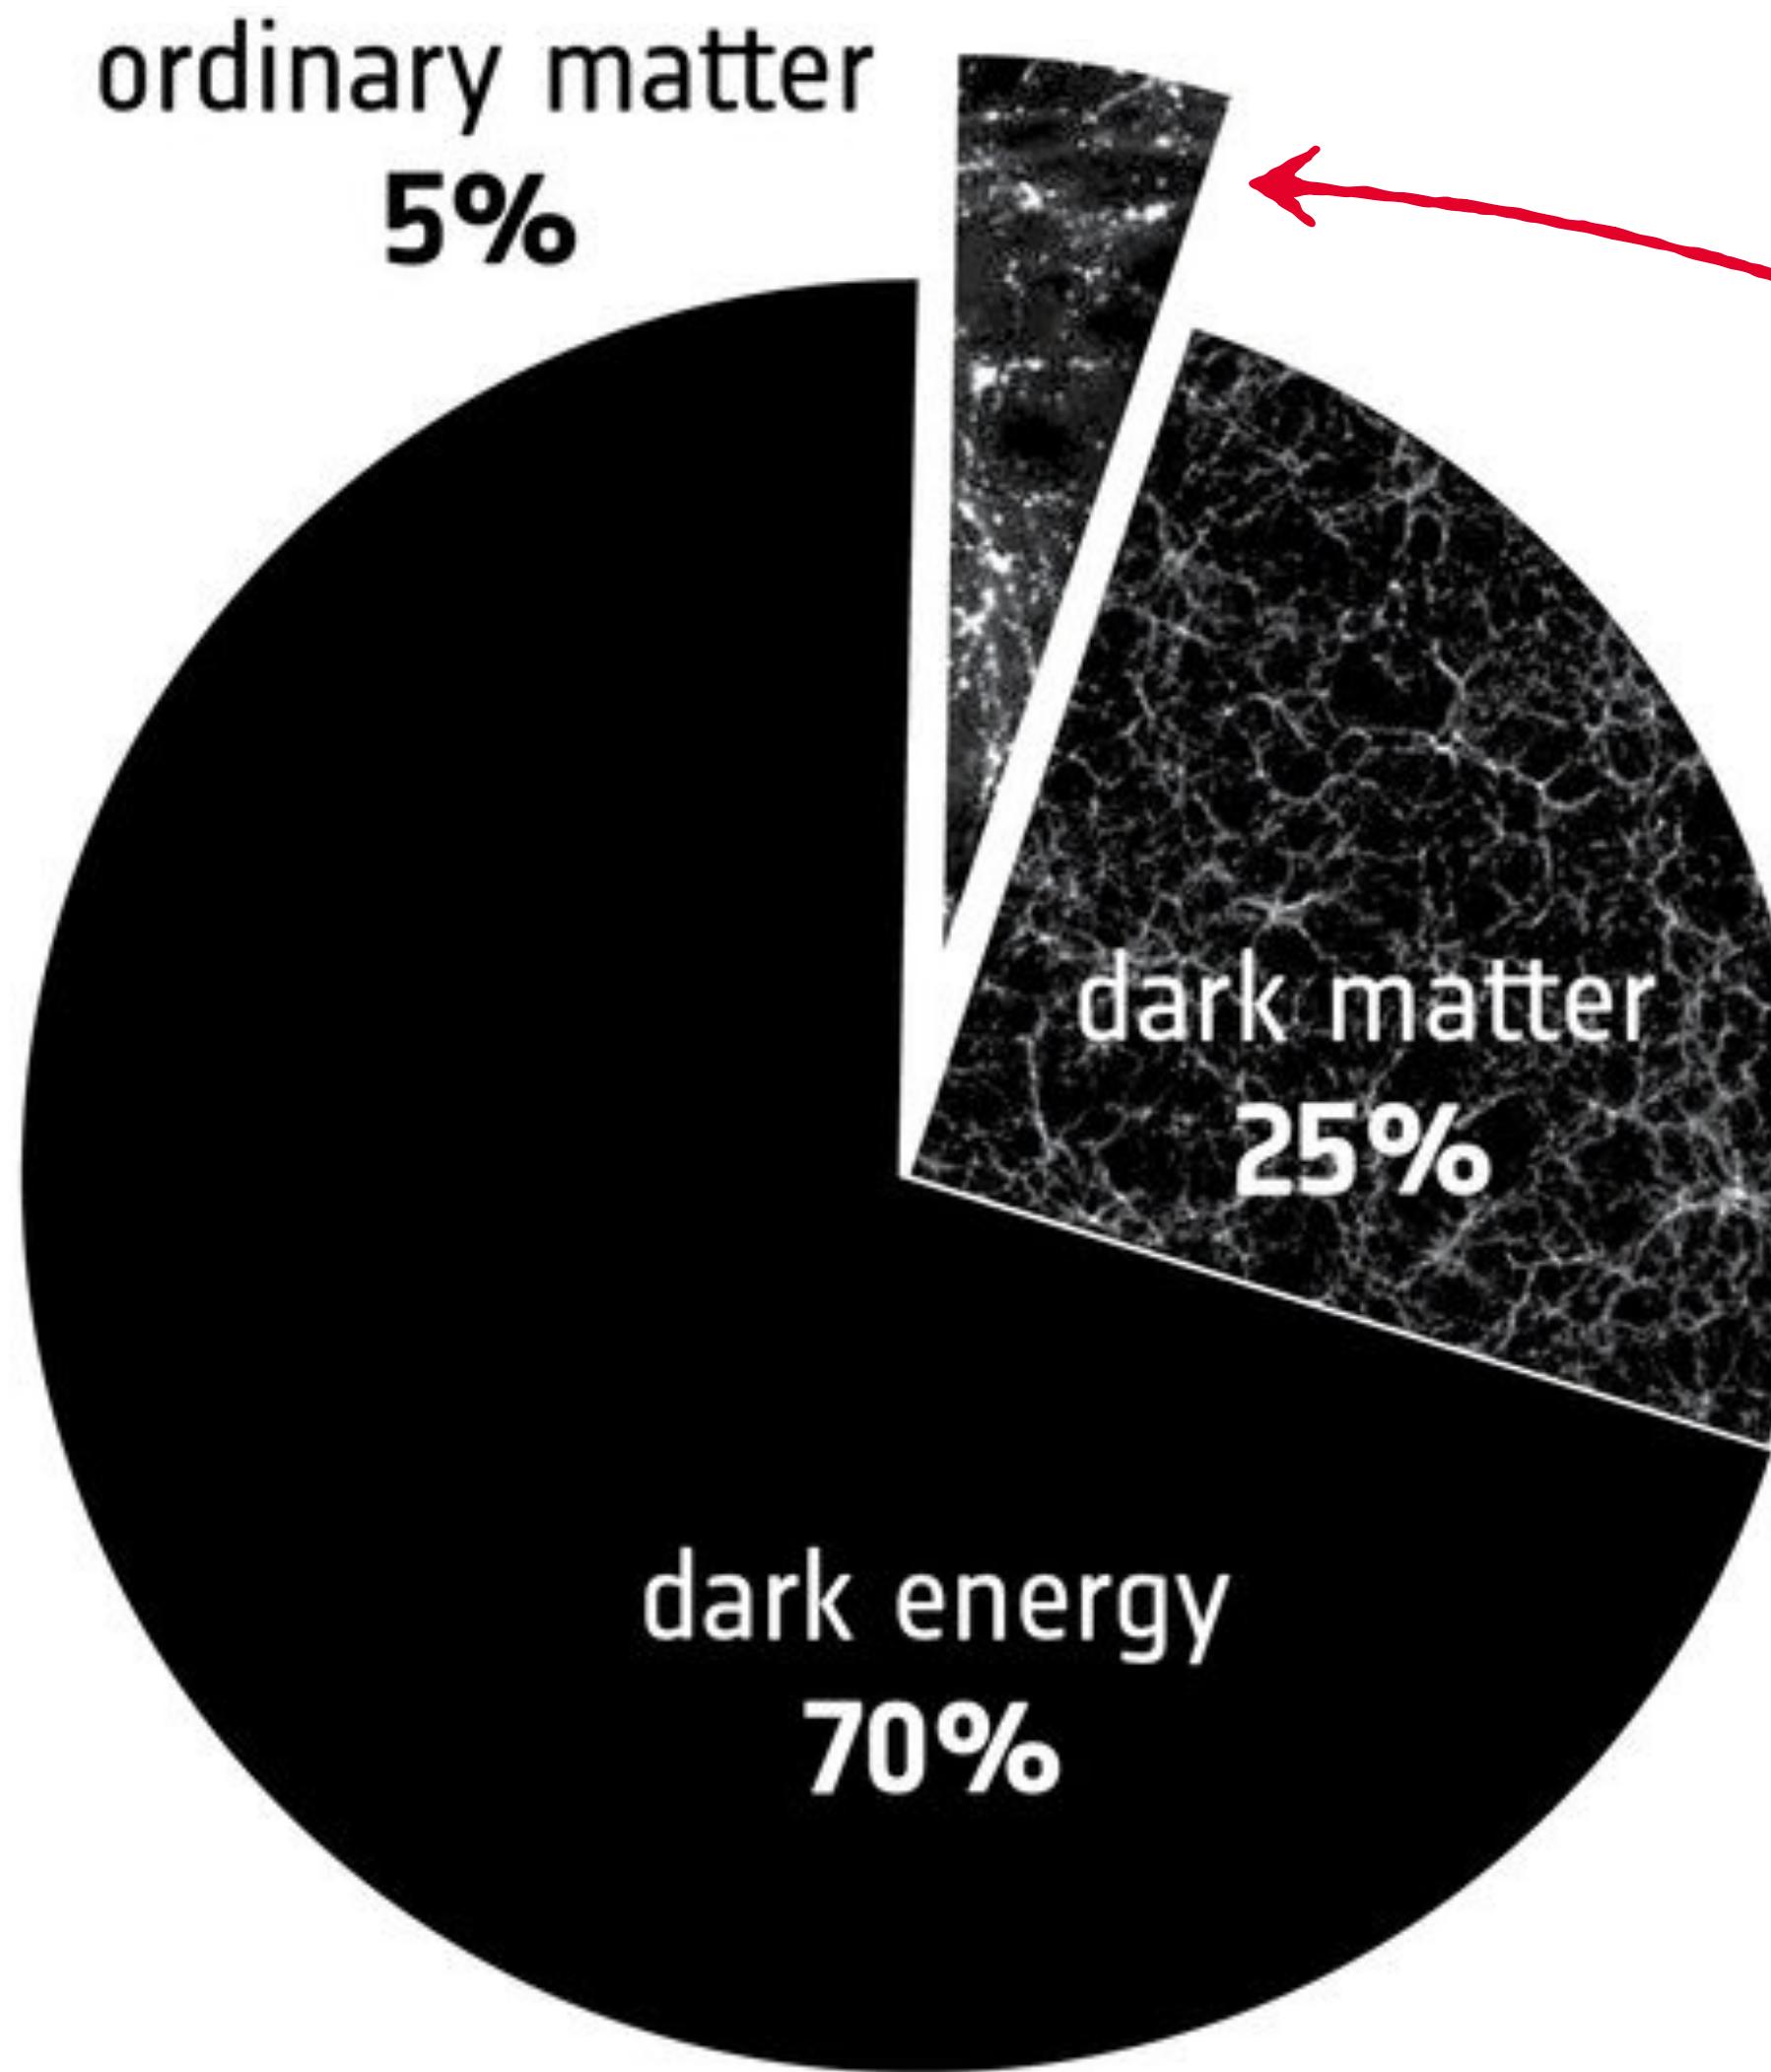

The concordance cosmological model

The concordance cosmological model

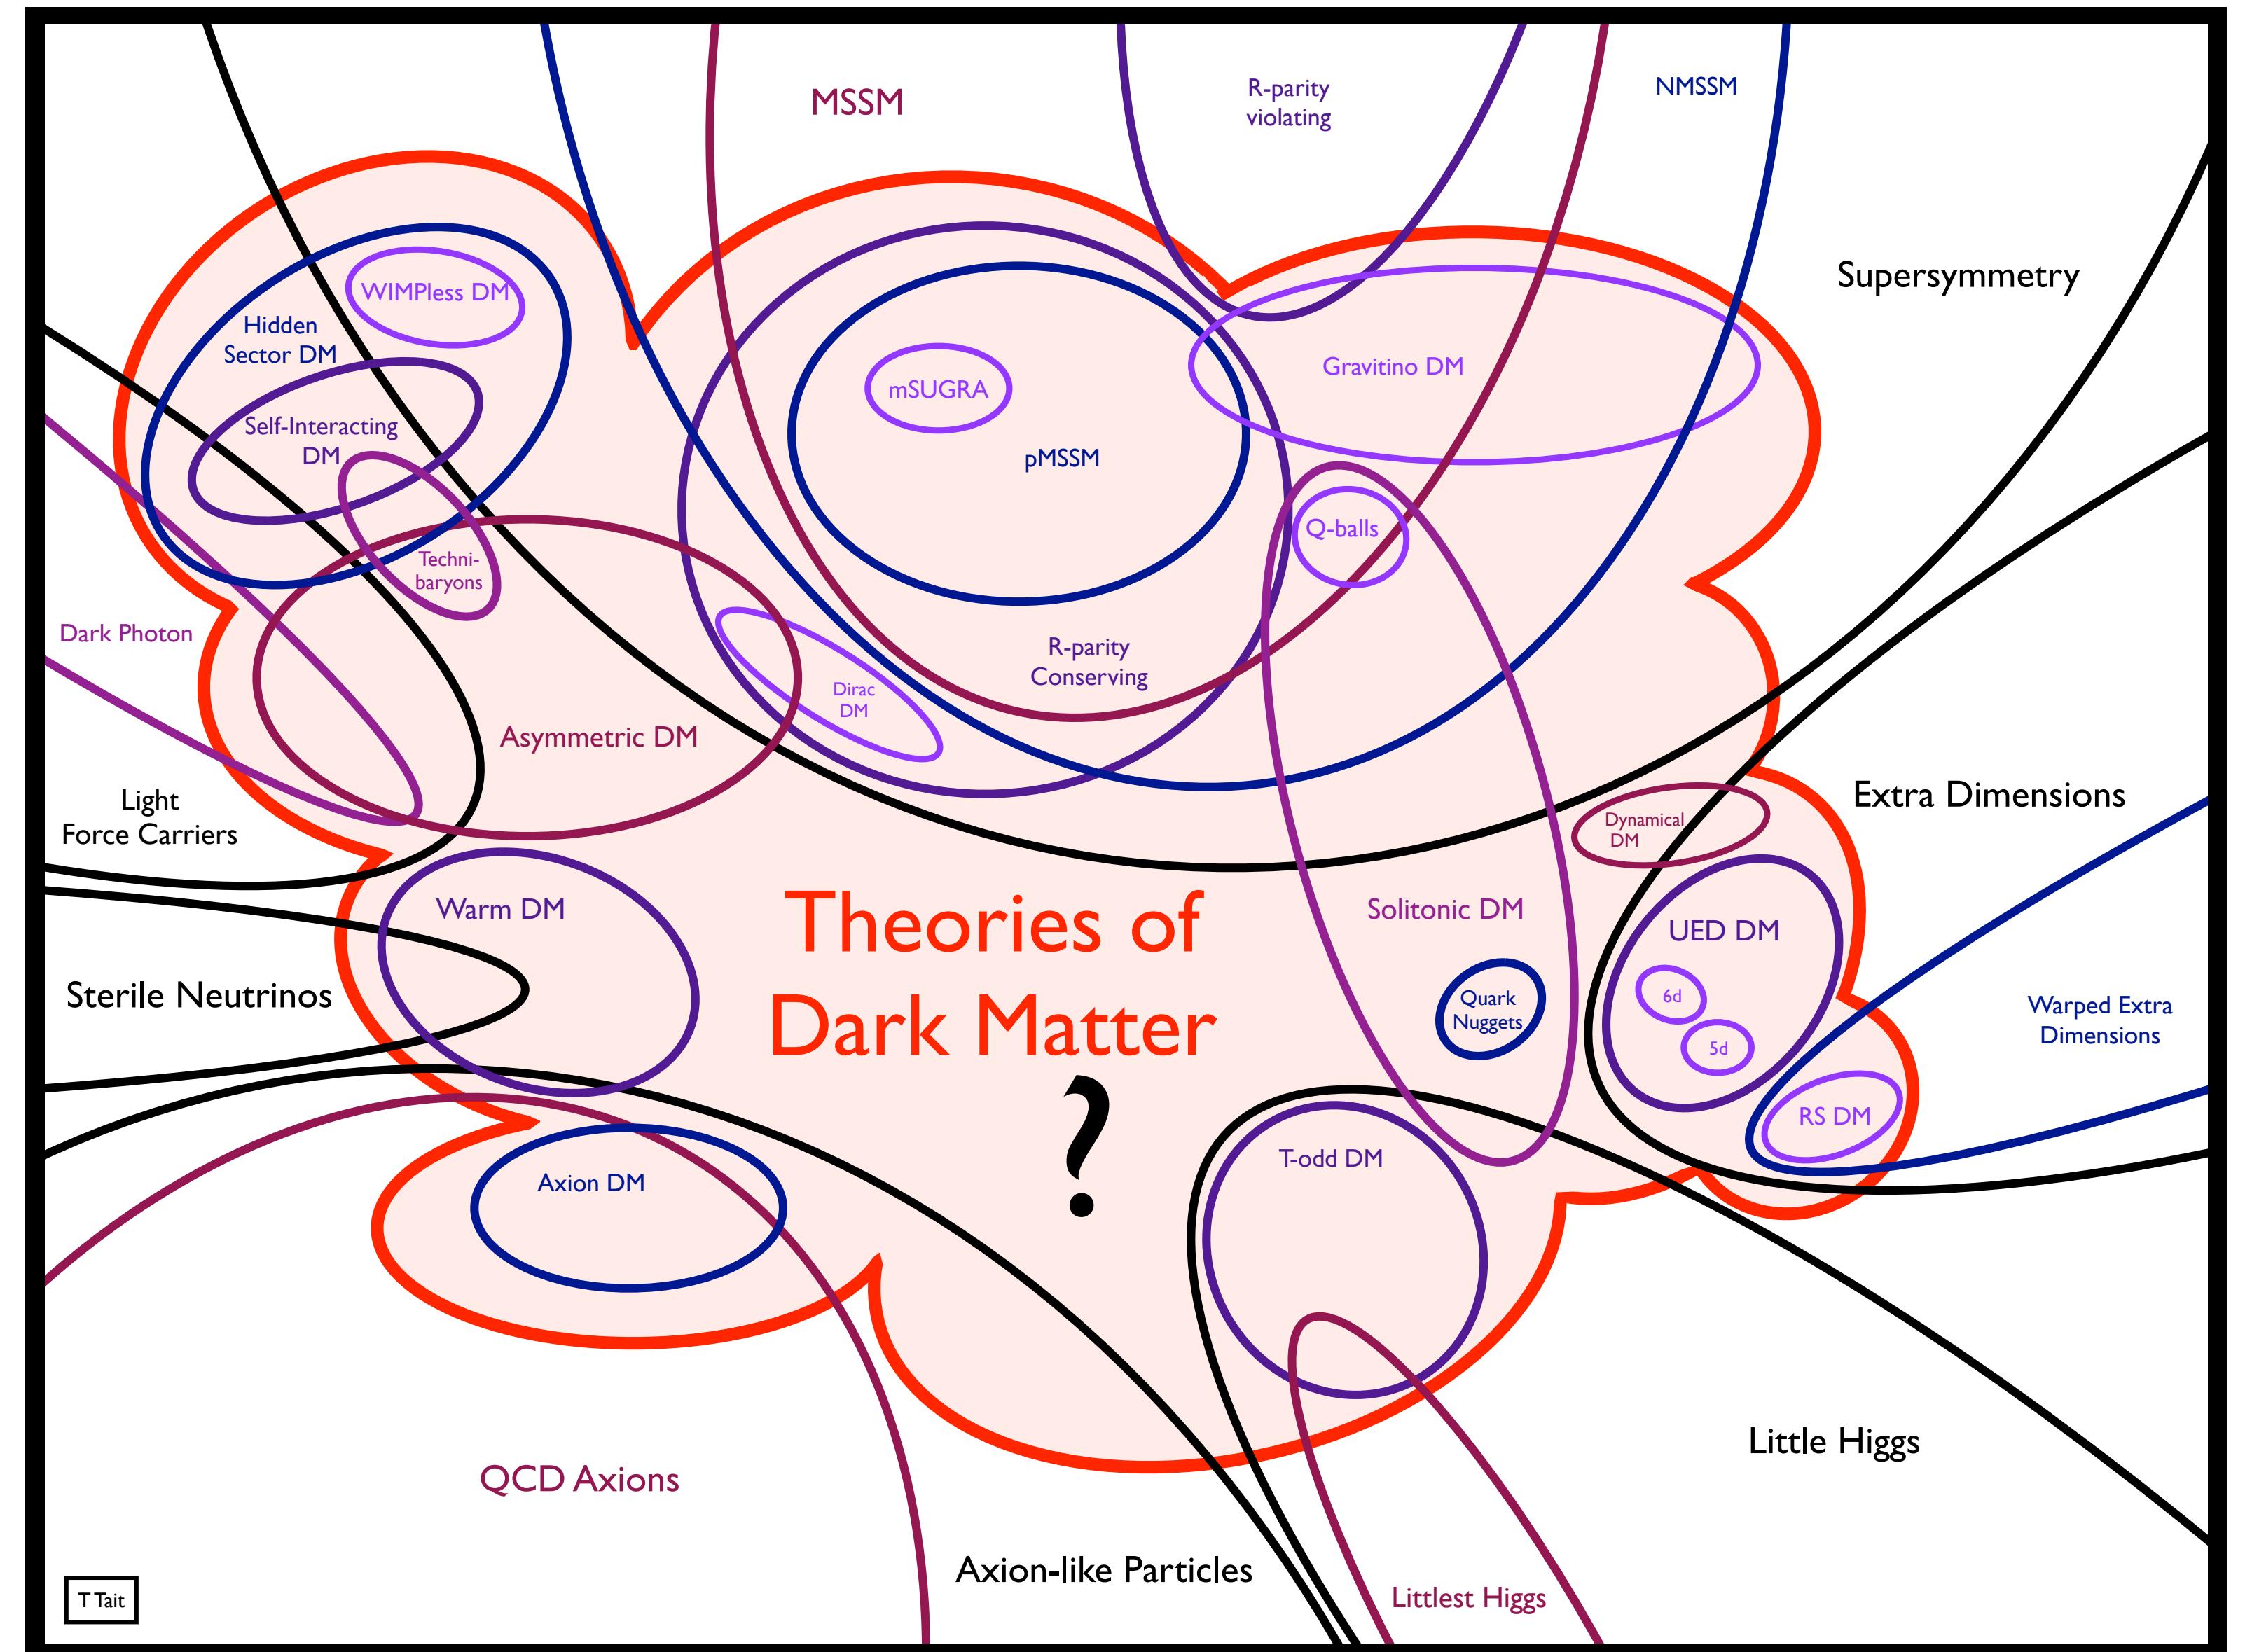

The concordance cosmological model

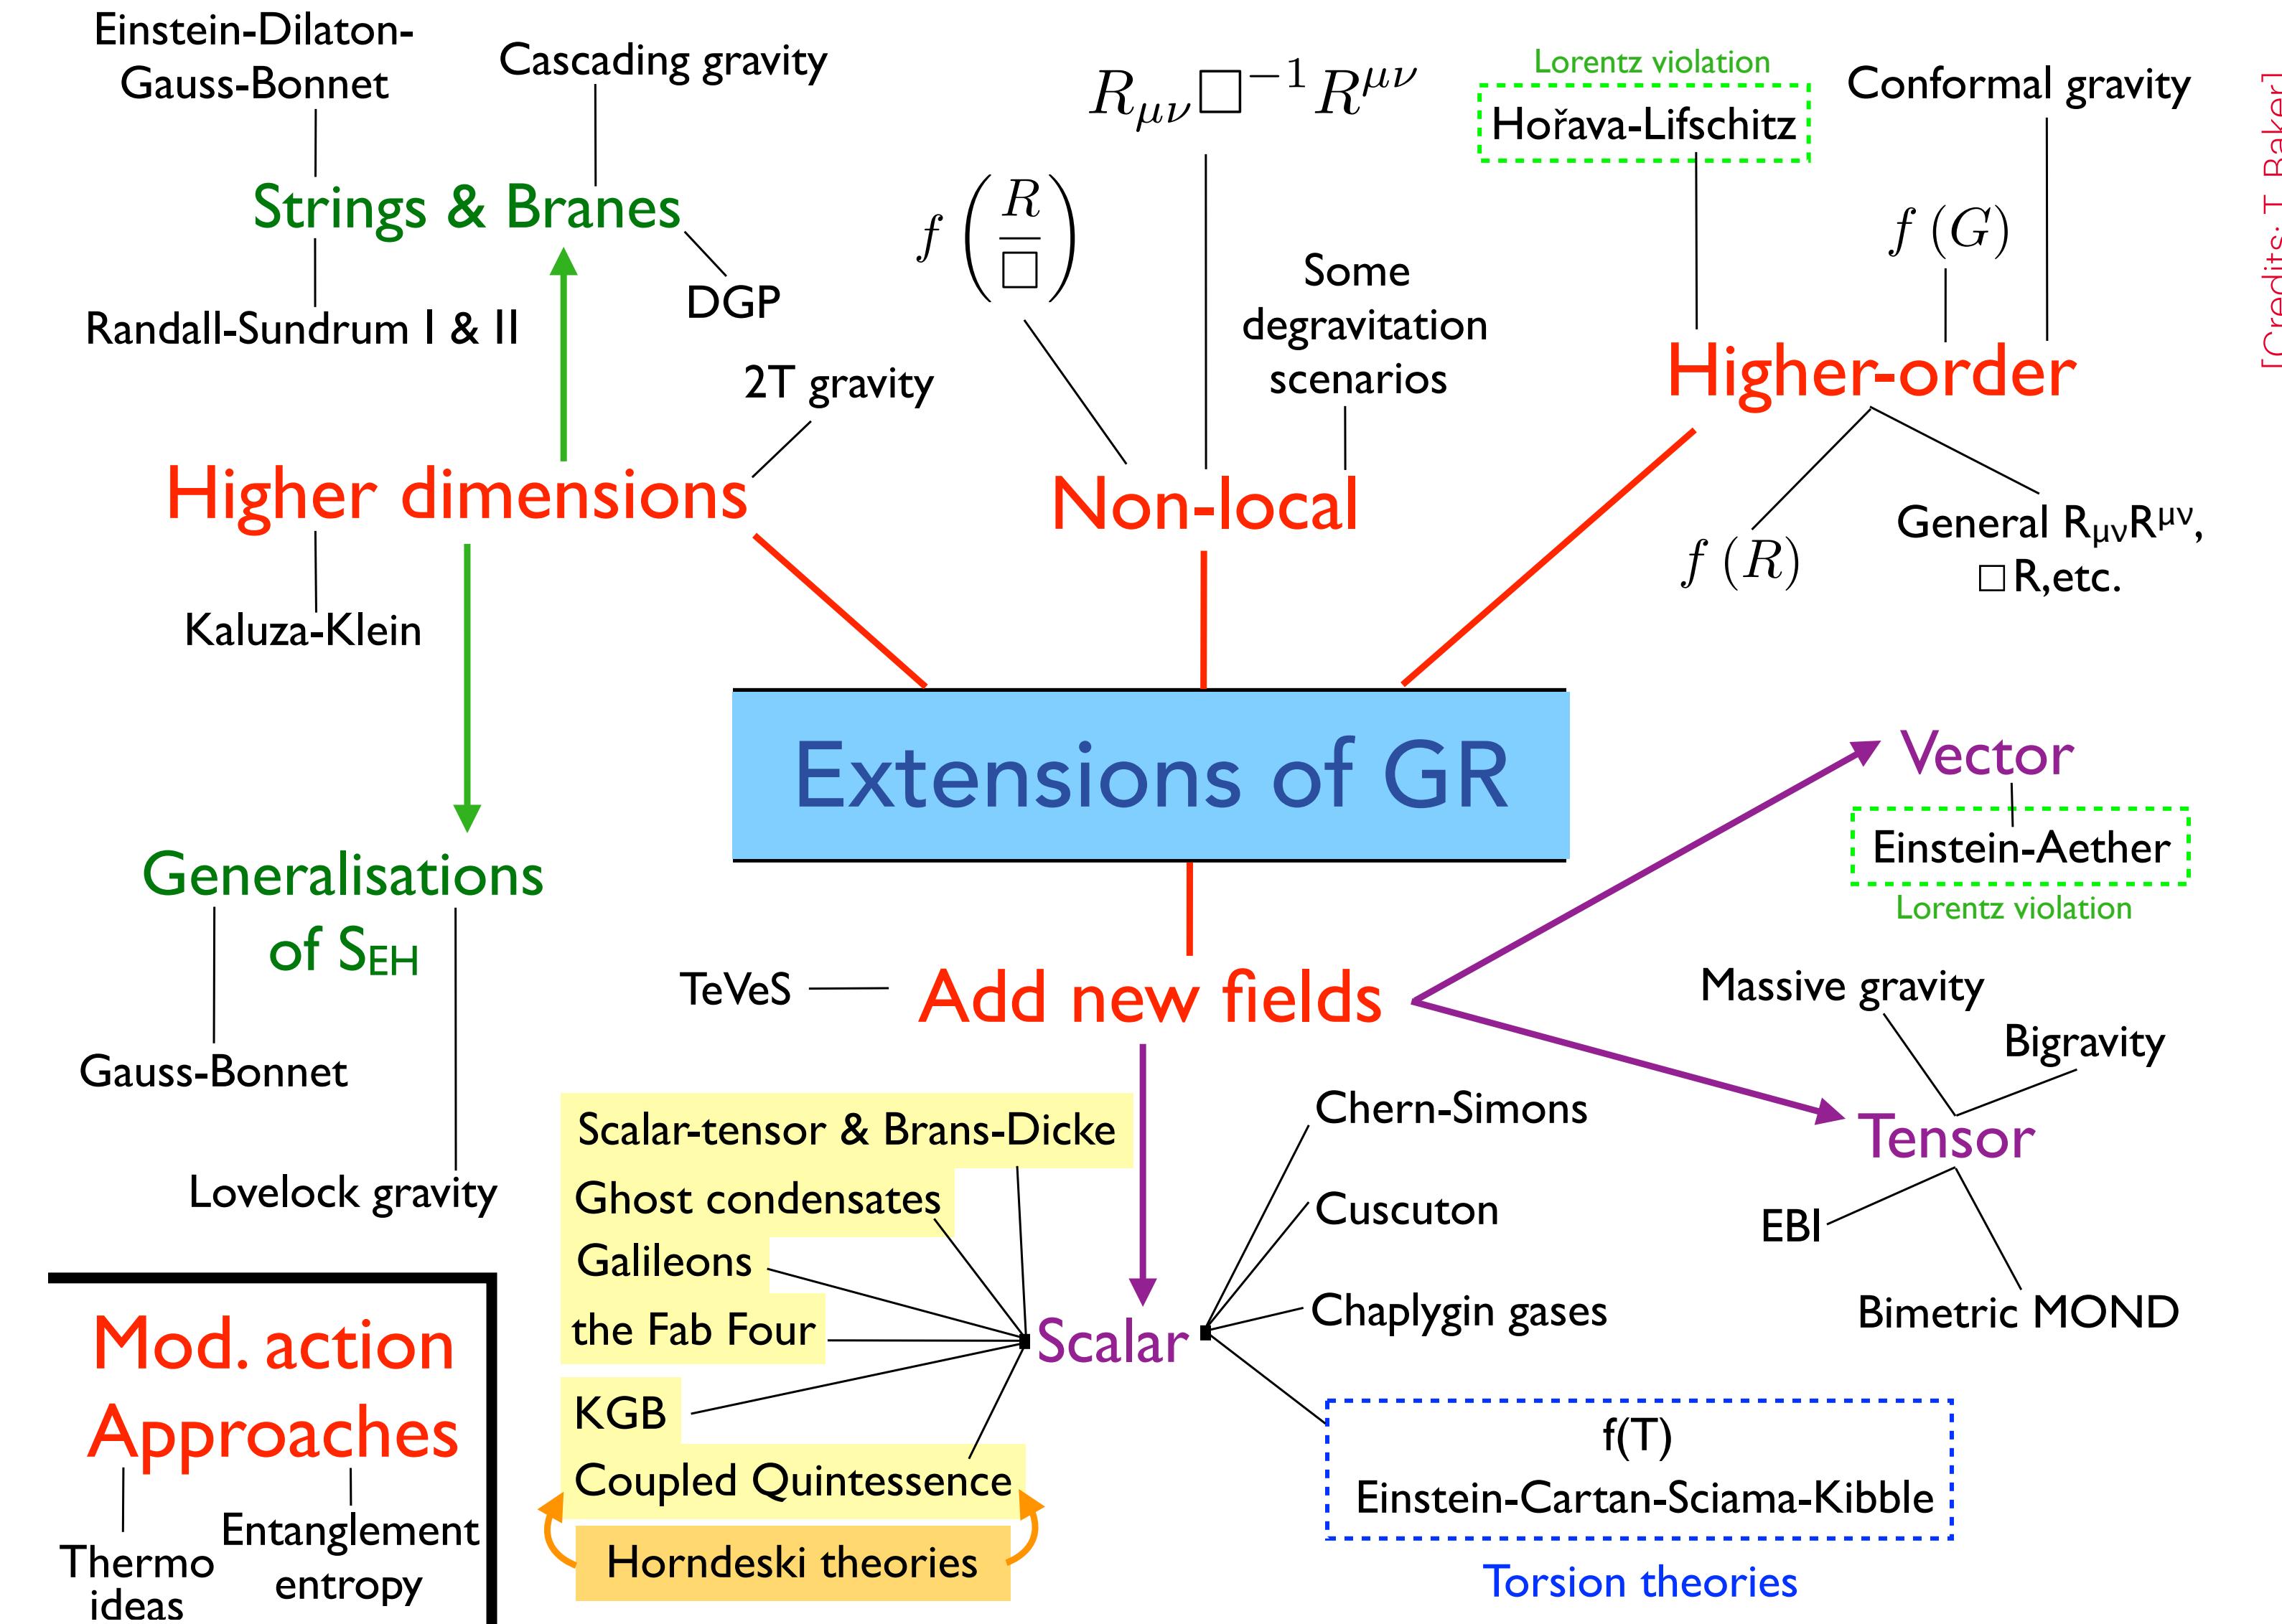

Dark matter

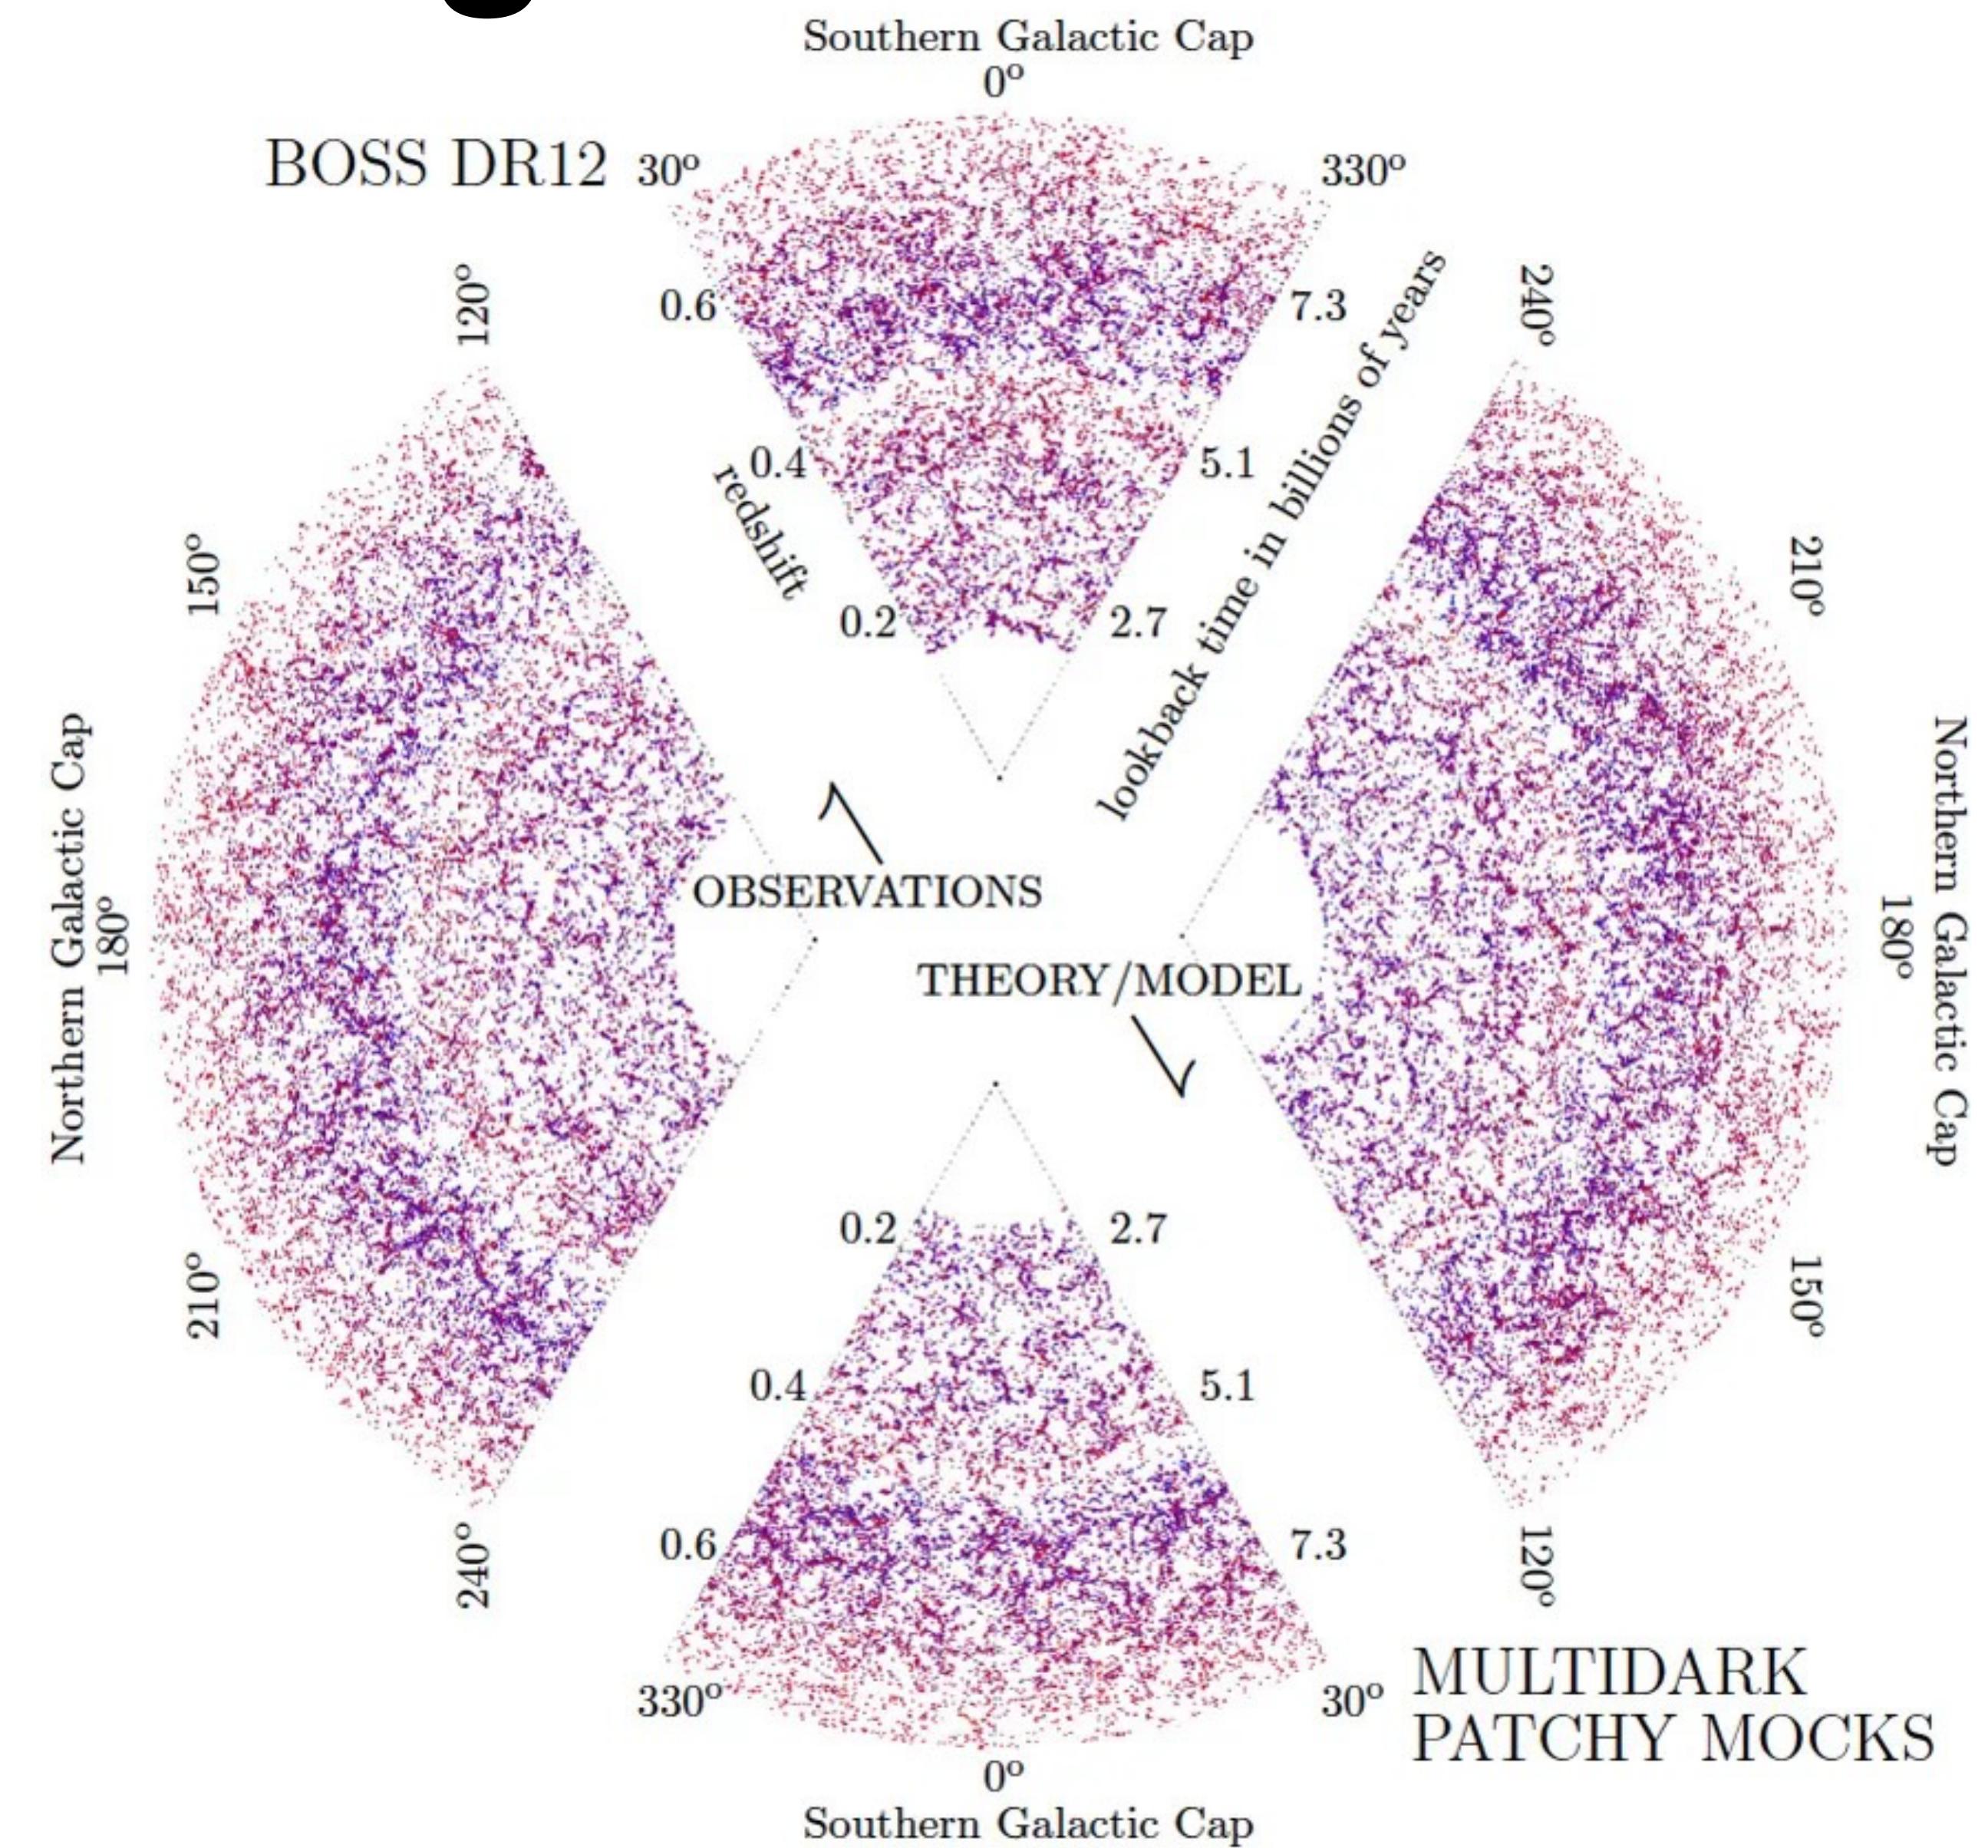

[Credits: T. Tait]

Dark energy

The cosmic large-scale structure

The cosmic large-scale structure

Approaches to cosmology

Theoretical	Models of dark energy/matter, modified gravity, inflation, relativistic corrections, effective field theory of the large-scale structure, ...
Observational	Galaxy properties (clustering, bias, populations, ...), weak lensing and intrinsic alignments, clustering of galaxy clusters, ...
Computational	Cosmological N-body and hydrodynamical simulations, approximate methods, ...
Statistical	Data analysis techniques, data weighting and optimisation, Bayesian inference, Markov chain Monte Carlo algorithms, data compression
Machine learning	'Big data' handling, neural networks (photometric redshifts, ellipticity measurements, foreground removal, ...), emulators, ...

Possible thesis titles

- Triennali
 - Optimising redshift binning for galaxy clustering [Camera]
 - Correct derivation of the Fisher information matrix for spectroscopic galaxy surveys [Camera]
 - Comparison of neutrino implementation in the CAMB and CLASS codes [Pace]
 - Different approaches to perturbation theory [Pace]
- Magistrali
 - SKAO forecasts w/ peculiar velocity in the non-linear regime via loop-perturbation theory [Camera]
 - Developing new smoking guns for systematics in HI intensity mapping/galaxy clustering [Camera]
 - Modelling of the cross-correlation of continuum galaxies and the UGRB [Camera]
 - Complexity reduction for next-generation galaxy survey data analysis [Camera]
 - Clustering and lensing analysis (3x2pt) for gravitational waves [Camera]
 - Development of the EoS_class code and QSA_class code [Pace]
 - Improvement of the quasi-static approach [Pace]
 - Structure formation in coupled dark energy models [Pace]
 - Perturbations in Unified Dark Matter models [Pace]
 - Extensions of the spherical collapse model [Pace]
 - Dynamical system analysis [Pace]
 - Refracted gravity [Pace/Diaferio]
